

## **RD LAB FE13 NODEJS HOMEWORK №2**

**Use NodeJS to implement CRUD API for notes.**

- **Requirements:**

- Use express to implement web-server;
- Use express Router for scaling your app;
- Use jsonwebtoken package for jwt authorization.

- **Acceptance criteria:**

- User is able to login into the system;
- User is able to view only personal notes;
- User is able to add, delete personal notes;
- User can see total number of personal notes;
- User can manage notes only when logged in;
- User can check/uncheck any note;
- Source code uploaded to repository and link sent to Kyrylo\_Yezhov@epam.com.

- **Optional criteria:**

- Ability to register users;
- Ability to edit personal notes;
- User can delete personal account;
- API docs generated with apidoc npm package;
- Simple UI for your application(would be a big plus).
